

Esteban J. Caro

Risk and Safety Consultant

Esteban, a Risk and Safety Consultant, is degree qualified in Computer Engineering. Esteban has performed technical and managerial duties on numerous domestic and international projects over the past few years with John Wright Company and IRC.

This includes:

- Undertaking hazard assessments and Bow Tie Analysis for a major oil company in support of an Operations Safety Case.
- Conducted numerous Formal Safety Assessments (FSAs) for major oil companies in the US and abroad and assisted in writing the Design Safety Cases.
- Assumed Integrity Management responsibilities for a major oil company. This included developing Performance Standards and Survivability Reviews in support of Process Safety.

Esteban's experience has given him an excellent understanding of HSSE management requirements along with fundamental grounding in major hazard management.
